

Gear Case Improvement: Anti-Wrap and Dust Shield

Before the dust shields and the new and improved anti-wrap, dirt and dust was able to get into the gearcase easily

Due to the new and improved anti-wrap and dust shield protector, dust is restricted from entering the gear case system because of the complicated angles that it must flow through before it reaches the gear case system

Field Proven. New Design. Over 9,000 Acres Tilled Before Preventative Maintenance Was Necessary.

(This was made possible with our new anti-wrap & dust shield designs)

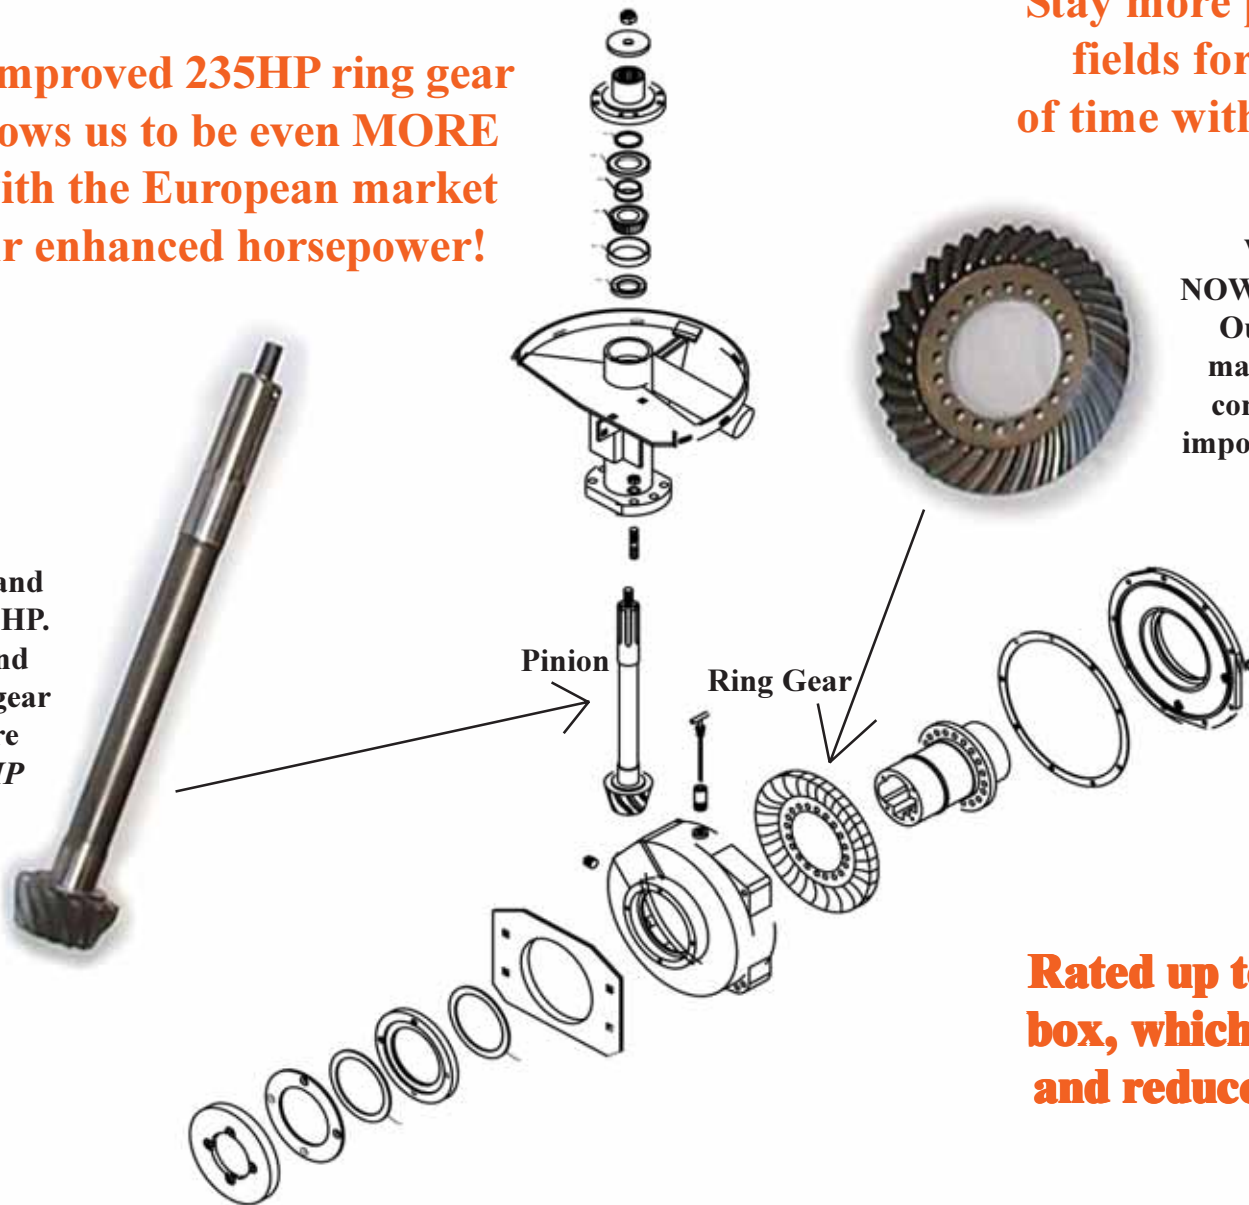

Gear Case Improvement: Greater Horsepower

Our new and improved 235HP ring gear and pinion allows us to be even MORE competitive with the European market because of our enhanced horsepower!

Stay more productive in your fields for a longer period of time with Northwest Tillers

Was 180 HP.
NOW 235 HP rating!!
Our single drive machines are now comparable to an imports Dual Drive!!!

Our ring gear and pinion was 180 HP. The all new and improved ring gear and pinion are NOW a 235 HP rating!!

Rated up to 235HP *per* gear box, which increases up time and reduces your down time

Field Proven. New Design. Over **9,000** Acres Tilled Before Preventative Maintenance Was Necessary.

(This was made possible with our new anti-wrap & dust shield designs)
