

# Tired of Replacing Your Tractors PTO on Your Direct Drive Machines and Fussing with Slip Clutches? Use the 50 Year Field Proven Belt Spring Tensioner System From NW Tillers

Belt alignment can be adjusted to add idler and belt life

The Belt Tensioning System on the drive sheaves automatically releases, letting the belts slip, eliminating the shock to your PTO..unlike direct drive systems

The Belt Stabilizer has been redesigned, taking less time to change the belts

Our Belt Drives have proven themselves to be far superior then direct drives because they eliminate the shock to the tractors PTO

50 Year, Field Proven, Belt Spring Tensioner System from NW

The Improved Belt Tension Design Improves Horse Power AND Life Expectancy of the Belts
