

NORTHWEST POTATO CULTIVATOR

American Made for the Serious Farmer

**The Northwest Potato Cultivator
reshapes potato beds and delivers
a greater yield**

The Advantages of a Northwest Potato Cultivator:

- Excellent bed formation
- Adjustable rotor system with C-blades
- Totally adjustable bed widths and heights
- Elimination of soil clods provides even water penetration
- Reduced erosion of beds during irrigation and rainstorms
- Northwest outperforms the competition

WORLD'S TOUGHEST TILLER

Solutions for American farming.

Versatile equipment is mandatory in today's diverse agricultural conditions. The Northwest Potato Cultivator is the only tiller on the market that converts from a cultivator to a bedder, full till or strip tiller.

The cultivator blades loosen soil and distribute it onto the top of the existing bed. The bedformer forms level beds in a single pass ensuring uniform crop development.

Our tillers give you the advantage of easy to change row centers and variable bed height.

Northwest blades (*above*) are attached to adjustable rotors and break up soil better than spikes (*below*) or tines

Rugged durability is built into every Northwest Tiller.

Plan on a long life expectancy with a Northwest Potato Cultivator. Every unit is manufactured with American-made 7/16" to 1/2" steel throughout. But tiller toughness goes much deeper than the hide:

- Heavy-duty three point hitch
- Triple seal bearings protect critical moving parts.
- A heavy duty gear box incorporates a reliable gear and pinion systems that just won't quit.
- A hardened 3-inch by 3-inch solid square shaft is built into every cultivator to handle stones and other tough debris.
- Two-piece blade-mount rotor design.

These features, along with a sensible two-piece rotor design, are just a part of what makes "One Tough Tiller."

Consider these options for increased adaptability to your conditions.

- A mesh roller
- Hard-faced blades
- Plastic lining
- Gauge wheels

The Belt Drive: Designed to protect your investment.

The Northwest Potato Cultivator is known throughout the world for its unique belt drive technology. Not only will our belt drive outlast clutch systems found in most implements today, it'll protect your tractor and PTO, too. It safeguards your tractor investment and reduces crucial down times by absorbing the shock.

American made parts when you need it

When the time comes for parts or service for your tiller, you can relax. Northwest Tillers has been in the business of building field-proven tillers for more than 40 years. Usually, tough tiller parts are readily available within a 24-hour period direct to your door.
