
NORTHWEST TILLER SOD BUSTER

American Made for the Serious Farmer

Problems mulching
sod? This is the
machine for you!

**Remove sod for field preparation with
the Northwest Tiller Sod Buster.**

The Advantages of a Northwest Tiller Sod Buster:

- Incorporates sod root mat in one pass instead of inadequate multiple passes with a disc
- Incorporates crown and root mat into soil evenly
- Eliminates clods and chunks for improved tilth
- Save time, fuel and tractor hours
- Proven, exclusive belt drive system protects tractor PTO and tiller
- Gearboxes up to 360 horsepower on dual drives
- Superior method for rotation, such as potatoes where harvest clods are an issue
- No other implement can equal a Northwest Tiller Sod Buster

ONE TOUGH TILLER

Solutions for American farming.

The Northwest Tiller Sod Buster can save you time and money by completely and evenly incorporating sod crown and root mat in *One Pass*, eliminating many passes with a disc.

The Sod Buster features a special rotor and blades to maximize mulching that eliminates clods. With a dual belt drive system driving two heavy-duty gearboxes rated to 360 horsepower and cooled by an external cooling system, the Sod Buster will handle the toughest conditions on the hottest days.

If you are using seed grass as a rotation crop to potato, don't expect to see those root bound dirt clods on your spud digger next year.

Rugged durability is built into every Northwest Tiller.

Plan on a long life expectancy with a Northwest Sod Buster. Every unit is manufactured with American-made 1/2" to 3/16" steel throughout. But tiller toughness goes much deeper than the hide:

- Heavy-duty three point hitch
- Triple seal bearings protect critical moving parts.
- A heavy-duty gearbox incorporates a reliable gear and pinion system that just won't quit.
- A hardened 3-inch by 3-inch solid square shaft is built into every unit to handle rocks and other tough debris.
- Two-piece blade-mount rotor design.

Standard features include:

- Extra rotors
- 26 rotors on 14 foot unit, 22 rotors on 12 foot unit
- 12" wide skid shoe
- Mesh roller, 2 feet wider than machine width
- 23" Gauge wheels on front tool bar
- Dual drive
- External gear case coolers (one for each case)

Optional features include:

- Hard faced blades
- Plastic liner

The Belt Drive: Designed to protect your investment.

The Northwest Rotary Tiller is known throughout the world for its unique belt drive technology. Not only will our belt drive outlast clutch systems found in most implements today, it'll protect your tractor and PTO, as well. It safeguards your tractor investment and reduces crucial down times by absorbing the shock. Easy belt adjustments can compensate for varied soil conditions.

American made parts when you need them.

When the time comes for parts or service for your tiller, you can relax. Northwest Tillers has been in the business of building field-proven tillers for more than 40 years. Usually, tough tiller parts are readily available within a 24-hour period direct to your door.
